@ matteo.greco@studenti.unitn.it

I am a Master's Degree student in Computer Science, specializing in Cyber Security at the University of Trento. I am an inquisitive person, eager to learn new skills and always seeking new topics to explore. I am looking for an internship experience where I can challenge myself, allowing me to put into practice the knowledge I gained in these years of university. It would be great if I could participate in a project where I can work in a young and dynamic environment and where I can gain practical experience on security challenges.

🎓 EDUCATION

2021 - Current University of Trento, Italy	**Master's Degree in Cyber Security** I am currently enrolled in the Cyber Security track of the Computer Science program course. During the Master I attended several courses related to Information Security as well as ICT innovation.
2018 - 2021 University of Trento, Italy	**Bachelor's Degree in Information Engineering and Business Organization** I have a Bachelor's Degree in Information Engineering. In particular, I took part in the business organization track oriented towards both computer science, business management and innovation. In my final thesis, which was titled "Evaluation of techniques and tools for network measurement applied on softwarized networks", I investigated how well-known techniques for measuring network performances react when executed on softwarized networks.
2013 - 2018 I.T.T. G.Chilesotti, Italy	**Diploma in Informatica** The majority of the subjects was primarily focused on Computer Science and Communication Technologies. My final thesis concerned the development of a first aid smartphone application for Android devices.

💼 PROFESSIONAL EXPERIENCE

July 2017 **May 2017**	**Erasmus+ Internship, BIAŁYSTOK SCIENCE AND TECHNOLOGY PARK, Poland** › Assisted the System Administrators in their daily tasks. › Studied the network structure and server maintenance routine of the firm. › Built constructive working relationships with the mentor and the team in a foreign cultural environment.

⚙ OTHER PROJECTS

Tutoring high-school students

I occasionally assist high school students with their IT studies, either to prepare them for upcoming tests or to clarify topics that they do not completely comprehend. Typically, the lectures focus on reviewing the relevant theory and then applying it to the exercises.

Flagship2 Participant

I recently participated in Flagship2, an online Cyber Security exercise organized by CyberSec4Europe. As participants, We played the role of employees of a critical infrastructure provider under attack. We discovered some operational anomalies that required further investigation. This showed that an active threat actor was present in the environment. The exercise's purpose was to investigate the attack path, restore the environment, and identify the initial breach that allowed the threat actor to infiltrate the network.

🐛 INTERESTS

› Chess tactics enthusiast
› Amateur swimmer
› Motorbike traveller

🧩 FORCES

› Very passionate about scientific topics
› Motivated and hard-working
› Team player

I authorize the processing of my personal data for the purpose of seeking an internship at the company
